

Fitting Instructions for Sportscraft seat swivels when used with standard seats on the Year 2002– 2006 DUCATO / BOXER commercial vehicles.

- 1) Slide the seat fully forward to gain access to the rear screws fixed downwards from the seat runners to the seat box. Remove the screws.
- 2) Slide the seat fully backwards and remove the screws at the front of the runners. This should allow you to lift the seat and runners out of the vehicle. Remove and retain nuts, bolts and washers.
- 3) Bolt the swivels lower surface to seat support frame using original bolts. Rotate the swivel 45 degrees to allow access to the rear mounting holes.
- 4) Replace seat with runners in original position on top of the swivel, fasten using fixings included.
- 5) Check sliders and swivel for smooth operation, check that all bolts are correctly tightened.

IMPORTANT: Please read these instructions carefully before proceeding, If in any doubt either contact a competent mechanic or ring your dealer.
